Abstract

SOLC is a cultural utility token powering the SOL ecosystem: **SOL TV** (streaming), **SOL Music** (artist tools), and **SOL Culture Shop** (commerce + collectibles). It's designed for **access, participation, and rewards—not** as an investment contract. Deployed on **Base** for speed and low fees.

Design Principles

- **Utility-first** (token-gated features, member pricing, allowlists, perks).
- **Transparency** (verified contract, public treasury, on-chain liquidity).
- **Compliance-aligned** (“no purchase necessary” giveaways; age/jurisdiction controls; clear risk language).
- **Forward-compatible** (NFT pairing, third-party integrations; **no promises of price appreciation**).

Technical Details

- Chain: Base (L2 on Ethereum), chain ID 8453
- Standard/Decimals: ERC-20 / 18
- DEX: Uniswap v3 (Base)
